

We claim:

1. An all-terrain vehicle comprising an accessory socket for supplying a power to an accessory device, wherein a rear carrier is mounted on the rear portion of the vehicle and the accessory socket is provided forwardly of the rear end of the rear carrier and downwardly of the rear carrier.

2. An all-terrain vehicle according to Claim 1, wherein the accessory socket is provided on a rear cowl.

3. An all-terrain vehicle according to Claim 2, wherein the accessory socket is provided between a pair of left and right rear combination lamps provided on the rear portion of the vehicle.

4. An all-terrain vehicle according to Claim 3, wherein the accessory socket is provided so as not to project outwardly from an imaginary plane corresponding to the ground when the vehicle is stored in the upright position with the rear portion oriented downward.

5. An all-terrain vehicle according to Claim 1, wherein the accessory socket

is mounted to a stay suspending from the rear carrier.

6. An all-terrain vehicle according to Claim 1, wherein the accessory socket is provided with a protective cover.

7. An all-terrain vehicle according to Claim 1, wherein a means is provided as a support member for mounting the accessory socket from the rear portion of the vehicle.
